EDUCATION

De La Salle - College of Saint Benilde   **Manila, Philippines**
Bachelor of Science in Information Systems Major in Data   October 2024
- **GPA:** 3.22 / 4.0
- **Honors:** Honorable Mention
- **Relevant Coursework:** Mobile and Web Development, Machine Learning and AI, Data Visualization, Data Analytics, Data Structures and Algorithms, Data Administration and Optimization

WORK & LEADERSHIP EXPERIENCE

Security Bank Corporation   Makati, Philippines
Retail Credit Risk Analytics and Strategy Intern   June 5, 2024 – August 30, 2024
- Successfully enhanced the ticketing system of the RCRAS team, attended knowledge sharing sessions and expanded technical skills by writing queries in AWS and Athena, Security Bank's cloud platform.
- Selected Experience:
  - RCRAS Dashboard
    - Developed a dashboard for the team's ticketing system, incorporating data cleaning, filtering and visualization techniques. This dashboard streamlined data presentation, enabling the team members to easily view ticket statuses and monitor ongoing processes, significantly enhancing clarity and efficiency in request tracking.
  - Coding Exercise: AWS and Athena
    - Tasked with converting AWS SAS codes to be compatible with Athena, enhancing my understanding of Security Bank's database architecture and deepening my experience with cloud platforms. This project improved my adaptability in cloud-based data management and furthered my skills in optimizing SQL for Athena's environment.

Freelance   Las Pinas City, Philippines
Programmer   2022
- Worked as a freelance programmer, mentoring college freshmen in foundational tech skills to support their early development in the tech field.
- Led projects in system console programming using Java and C++ and introduced students to web design using HTML, providing hands-on experience in essential programming and design concepts.

Lydia's Kitchen and Restaurant   Las Pinas City, Philippines
Shopify Developer   2023
- Served as a developer and designer for Lydia's Kitchen and Restaurant, building an online store using Shopify to enable efficient product sales. Designed and implemented an e-commerce solution that expanded the restaurant's reach and streamlined the online ordering experience for customers.

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: HTML | CSS | JavaScript | MSSQL | C# | Java | Python | Kotlin | C++ | SAS

Certifications & Training: UBPX: Data Science Development Program | UBPX: Fintech 101 | UBPX: Data Science Apprentice | UBPX: Python 101 | Sololearn: SQL Course

Activities & Participations: Benilde Hacks 2021 | 2nd Place IStreme: Aimazing Race | TechTalk: Disruptive Technologies | Fundamentals of Arduino

Interests: Deep interest in the development of Machine learning and artificial intelligence and its adaptations to the future.
